

To,

Prof. Dr. Mazahir. T. Hassan,

Group Leader,

Achucarro Basque Center for Neuroscience & The Science Bridge.

Dear Dr. Mazahir,

It was a pleasure meeting you and talking more about how our organizations could collaborate to benefit science. We hope to offer voluntary, educational, scientific and community joint projects that can make frontline activities of The Science Bridge more effective. Although it can bring great benefits, we believe that working with other organizations is more complex than working alone. Its success rests on a combination of formal and informal ways of achieving good working relationships on both an organizational and an individual level. We aim at developing Alliance with the intent of forming scientific linkages between our Recipient Scientists in developing country like Pakistan and the Western Counterparts. The priority research areas within our organization are to address Sustainable Development Goals Number 3,4,5,6 & 10. We expect to be able to take better initiatives and improve quality of care by linking the priorities in health care and this collaboration will explore ways to make this happen and to evaluate its impact on the research and health care system.

Look forward to working with you on this collaboration.

Best Regards,

Dr.Sadaf Ahmed

CEO, AEIRC.
